

Runway Safety and Runway Incursions

The Office of Runway Safety will show you very recent examples of the near misses on the ground. It doesn't matter how many hours in your logbook or the certificate in your pocket, you too can be one of the growing numbers of pilots that get "lost" on the airport, or worse yet, cause a near miss on the ground. Learn how you can help avoid this problem.

Directions: From Hwy 167 go East on 15th Avenue NW one mile. Turn North on D Street NE. Follow the road and it becomes E St. NE. Turn left on 23rd Street NE.

A message from the National FAASafetyTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
